CAREER SUMMARY

Fullstack Developer with 2+ years of experience in building and maintaining scalable web applications. Experienced in frontend and backend development using React, Next.js, Node.js, Express.js, Laravel, and relational databases. Strong understanding of REST API integration, authentication systems, and database design. Proven ability to work on production-level systems including leasing applications, marketplace platforms, and backend systems for Battery Energy Storage Systems (BESS). Passionate about writing clean, maintainable, and efficient code.

TECHNICAL SKILLS

- Programming Languages: PHP, JavaScript (ES6+), TypeScript, SQL
- Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
- Backend: Node.js, Express.js, RESTful API Development
- Databases: MySQL, PostgreSQL DB
- Tools & Technologies: Git, GitHub, Postman, Sequelize ORM, Apidog
- Deployment & Cloud: Vercel, basic AWS knowledge
- Other: Agile/Scrum, CI/CD (basic), Responsive Web Design

PROFESSIONAL EXPERIENCE

➤ Software Developer | PT. Elektrik Baterai Indonesia | Nov 2025 – Present

Tech Stack: Next.js, Node.js, Express.js, PostgreSQL

- Develop frontend leasing web application using Next.js with API integration from backend services.
- Implement dashboard and installment modules with dynamic data rendering.
- Contribute to backend development for Battery Energy Storage System (BESS) full system.
- Design and maintain RESTful APIs and relational database schemas.
- Implement authentication and role-based access control.
- Collaborate with engineers to ensure full system integration between frontend, backend, and operational systems.
- Optimize application performance and improve system scalability.

➤ Fullstack Web Developer (Internship) | PT. Tiga Serangkai Pustaka Mandiri Group – Assalaam Hypermarket | Sept 2024 – Jan 2025

Tech Stack: Laravel, PHP, MySQL, Tailwind CSS

- Revised and improved company marketplace website to enhance UI/UX and performance.
- Developed admin dashboard for transaction monitoring and member management.
- Built online customer registration system integrated with marketplace platform.
- Implemented backend logic using Laravel and optimized database queries.
- Ensured responsive design across devices using Tailwind CSS.

➤ **Frontend Web Developer (Internship) | Core Initiative Studio | Feb 2024 – Mar 2024**

Tech Stack: Next.JS, REST API, Tailwind CSS

- Advanced frontend development skills through real project implementation.
- Built frontend applications with API integration using Next.js.
- Implemented server-side rendering (SSR) and client-side rendering strategies.
- Improved component structure and reusability.
- Collaborated with backend developers to ensure proper API integration and error handling.

➤ **Fullstack Web Developer (Internship) | PT Rakamin Kolektif Madani | Aug 2023 – Feb 2024**

Tech Stack: React.JS, Node.JS, Express.JS, MySQL, Sequelize

- Completed comprehensive fullstack development training program.
- Developed final project: Inventory Management System using React and Express.js.
- Built RESTful APIs for product, stock, and transaction management.
- Implemented CRUD functionality and JWT-based authentication.
- Managed relational database using Sequelize ORM.
- Participated in Agile development cycle and code review sessions.

PROJECT EXPERIENCE

➤ **Leasing Web Application (Frontend)**

Tech Stack: Next.JS, REST API

- Developed frontend modules for dashboard and installment management.
- Integrated backend APIs for real-time transaction data.
- Implemented dynamic routing and protected pages.

➤ **Battery Energy Storage System (BESS Backend)**

Tech Stack: Node.JS, Express.JS, PostgreSQL

- Contributed to backend system development for energy storage management.
- Built APIs for system monitoring and operational data processing.
- Designed database structure for system scalability.

➤ **Inventory Management System**

Tech Stack: React.JS, Express.JS, PostgreSQL

- Developed fullstack inventory system as final internship project.
- Implemented product tracking, stock management, and transaction records.
- Designed RESTful API and relational database schema.

➤ **Freelance & Client Projects**

- Developed private tutoring (Bimbel) website including landing page and information system.
- Designed branding materials including logo and UI layout.
- Built responsive landing pages for various small business clients.
- Delivered custom websites tailored to client requirements.
- Managed deployment and hosting setup for client projects.

➤ **Study Program Recommendation System (Final Project)**

Tech Stack: PHP, Laravel, Tailwind CSS, Machine Learning, Cosine Similarity

- Implemented Content-Based Filtering using Binary Vector Representation.
- Applied Cosine Similarity algorithm for recommendation engine.
- Evaluated model performance using precision and recall metrics.

EDUCATION

- **Tiga Serangkai University – B.Sc. Informatics Engineering (2021 – 2025) | GPA: 3.64/4.00**

Final Project: Implementation of Content-Based Filtering in Study Program Recommendation System using Binary Vector Representation and Cosine Similarity.

- **SMA Negeri 7 Surakarta (2015 – 2018)**
